

SB600

**When technique
meets style**

Pop-up cable waste with an ultra fast flow rate
equipped with a solid brass handle and covering plug.

WIRQUIN

wirquin.com

Covering plug and handle in solid brass.

Very compact thanks to the shape of the bottle trap and the extra flat overflow head.

The auto-centring waste washer ensures that the waste stays in position when the grate is screwed on.

Adjustable outlet : horizontally and vertically adjustable for easier connection and faster draining.

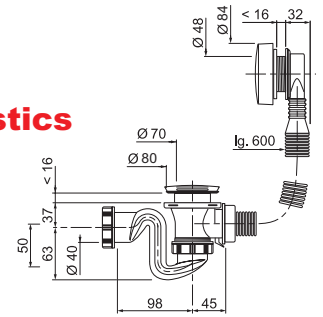

High resistance stainless steel cable integrated into the overflow tube.

Technical characteristics

- Adapts to all standard baths, enamelled steel and acrylic (height from 0 cm to 16 cm)
- Guaranteed 10 years

Trap

- **Ultra-fast flow rate** : 1,04 litres per second (62 litres per minute) in 330 mm of water (22 % more than that required by the NF standard : 0.85 litres per second)
- **Permanent auto-cleaning** : the bottle trap's smooth interior eliminates all risk of retention (hair, soap, sand ...)
- **Adjustable outlet** : vertically adjustable from 0° to 40° for easier connection and faster draining : even at its most extreme angle (40 ° angle) it remains in compliance with the French standard (0.86 litres per second)
- **Most compact on the market** requiring the least space under the bathtub : 104 mm (even suitable for reinforced acrylic baths)

The cable system

- Handle in Solid brass, which rotates 360°, opening and closing indifferently in either direction
- Covering plug in solid brass
- Quick and easy installation thanks to the auto-centring waste washer, which ensures that the waste stays in position when the grate is screwed on.
- Cable system is protected thanks to the unforceable handle : tested over 100,000 cycles through high endurance tests where the plug is artificially held down while opening and closing were performed.
- High resistance stainless steel cable integrated into the overflow tube for easier installation.
- Compact overflow head : 24 mm behind the bathtub.
- Created with even the most minor detail in mind : the screw found in the overflow head can be easily tightened without any tool.

Sales Tools

Packaging :

- Box in 5 colours with a picture of the product, topped in silver to emphasise its positioning on an up-market.
- For the sales concept "Zoom" order 9 chrome-plated products
- Display shelf in Plexiglass.
